Dileep Patil K R

Full Stack Software Engineer (C#, ASP.NET, Angular, REST APIs) | 2+ Year Exp

dileeppatilkr1222@gmail.com| +91-9900915849 | Tumkur, Karnataka, India
Portfolio: https://dileep-2022.github.io/Portfolio_/

Professional Summary

Full Stack Software Engineer with 2+ year of experience developing scalable web applications using Angular, TypeScript, ASP.NET, and SQL. Strong in crafting responsive UIs, integrating REST APIs, optimizing performance, and debugging. MCA graduate with solid fundamentals and hands-on experience in both frontend and backend development.

Technical Skills

- **Frontend Technologies:** Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS
- **CSS Frameworks & UI Libraries:** Bootstrap, Tailwind CSS, Angular Material, ngx-emoji-mart
- **Backend Technologies:** C#, ASP.NET, RESTful APIs
- **Tools & Platforms:** Git/Version Control, Postman, Firebase Cloud Messaging (FCM), Visual Studio, Visual Studio Code
- **Database:** SQL (MySQL, PostgreSQL), MongoDB
- **Methodologies:** Agile Development, Test Driven Development, Responsive Design, API Integration
- **Core Competencies:** Full Stack Development, UI/UX Implementation, Code Optimization, Debugging

---

Professional Experience

Full Stack Software Engineer

Acelucid Technologies Private Limited
May 2024 – Present (2+ year)

Developed enterprise-level leave management & HR admin systems with Angular and role-based access, improving workflow efficiency. Built mobile-first UIs using Angular standalone components and reusable modules. Integrated and optimized REST APIs ensuring high performance and 99% system uptime. Reduced

form validation errors by 45% using reactive forms and custom validators. Improved application load time by 40% through code optimization and lazy loading. Debugged and resolved 50+ critical issues using Chrome DevTools and Postman. Collaborated in Agile sprints (code reviews, planning, standups) and mentored junior developers.

Projects

Leave Management System (Angular): role-based dashboards, approval workflow UI, email notification interfaces, and large-dataset table optimization.

"Highland" APIs (ASP.NET): Designed database schema & built REST APIs with pagination, filtering, and LINQ queries.

Real-Time Notifications (Angular + FCM): Implemented a service-worker–based notification system with background delivery and offline fallback handling; improved user engagement by 35%.

Business Websites: Responsive design, backend validation, cost calculators improving lead conversion by 25%.

Education

MCA, Siddaganga Institute of Technology, Tumkur — CGPA: 8.79 (2024)

BCA, Seshadripuram College, Tumkur — CGPA: 8.4 (2022)

Certifications & Learning

- GeeksforGeeks (GFG) C++ Certification
- NPTEL Programming in Java Certification
- Continuously learning CI/CD, Cloud Technologies (Azure/AWS), Angular, React, and Microservices through online courses and technical tutorials.

Professional Achievements

- Successfully delivered 5+ production-ready applications within tight deadlines while maintaining high code quality standards
- Reduced application load time by 40% through code optimization and lazy loading implementation
- Contributed to team knowledge base by documenting best practices and creating reusable code templates
